

Mapping Your Success

Where are You and Where Do You Want to Go?

Leadership is required at every level, in every organization; it is also essential to the ownership of your career. You can let your professional path unfold as it will, or be proactive and plan the strategic steps necessary to achieve your long-term goals. Design a future with intention and the self-awareness of what you truly want and need, in order to develop a satisfying and purposeful professional future.

This program is a one-day workshop about you and your professional development. It will help you to assess where you are and where you want to go.

Do You Have a Plan?

- Have you defined what it is you want professionally?
- Do you know your strengths and how to use them to your advantage?
- How would you begin to strategically plan your long-term goals?
- Are you ready to be a leader at every level of your career?
- Would it help if you had a coach to advise you?

In this ground-breaking workshop, you will:

- Complete an individualized survey to clarify what 'it' is that inspires you and more importantly, what feeds your soul and keeps you motivated
- Take an in-depth, globally recognized assessment to identify the practices and behaviors that need to be sustained, modified, or added to supplement your professional growth
- Create an ongoing, actionable, and sustainable development plan for your career path that is flexible, strategic, and will leverage your strengths
- Develop an individualized road-map of programs offered through the Women'sVision Foundation to complement your goals and enhance your future success
- Receive two hours of individual coaching post workshop, to help you implement your plan
